ArcSight Forwarding Connector Release Notes

These release notes provide information for the current release of the ArcSight Forwarding Connector.

ArcSight ESM Forwarding Connector

The ArcSight ESM Forwarding Connector can receive events from a source ESM Manager and then send them to a secondary destination ESM Manager, a non-ESM location (such as HP Operations Manager), or to an ArcSight Logger.

Supported Versions of HP OMi

- HP OMi v9.0.1

OMi users are strongly encouraged to apply the latest patch, OMI_00005 (build 09.01.210), to obtain critical fixes before running this integration.

What's New in the ArcSight Forwarding Connector

To provide event and performance management of enterprise systems, applications, and services, the ArcSight Forwarding Connector now supports HP OMi, allowing events to be forwarded from ArcSight ESM to HP OMi. Also, the ArcSight Forwarding Connector now supports JRE 1.6.0_26. McAfee ePO 4.6 is now supported by the ArcSight Forwarding Connector.

To Apply This Release

ArcSight recommends using the Forwarding Connector executable included with the corresponding ESM release. Download and install the appropriate executable for your platform. Note that these version numbers are specific to Forwarding Connector releases, not release numbers of other ArcSight products.

The installation executables are:

- ArcSight-5.1.5.5973.0-SuperConnector-Linux.bin
- ArcSight-5.1.5.5973.0-SuperConnector-Win.exe
- ArcSight-5.1.5.5973.0-SuperConnector-AIX.bin
- ArcSight-5.1.5.5973.0-SuperConnector-Solaris.bin
