RepSM Model Import Connector Release Notes

The HPE Reputation Security Monitor (RepSM) solution uses internet reputation data to detect Advance Persistent Threats and zero day attacks as well as provide context to security events. The Model Import Connector for RepSM is a component of RepSM which retrieves reputation data from the RepSM threat intelligence service (powered by HPE DV Labs), processes this data, and forwards it to ArcSight ESM.

The threat intelligence includes reputation information about internet nodes which are known to exhibit bad behavior. The ill reputed nodes are identified by their network address or Domain Name System (DNS) name. This data is used by the accompanying RepSM content package to detect malware infected machines, zero day attacks, and dangerous browsing. The user can also use the data to implement custom ESM solutions. For further details on this solution, see the HPE Reputation Security Monitor Solution Guide.

What's New

- Added support for Java 7.
- Added support for Red Hat Enterprise Linux (RHEL) 7.1, 64-bit.

Supported Platforms

The connector supports the following platforms:

- Microsoft Windows Server 2008 R2, 64-bit
- Microsoft Windows Server 2012 R2, 64-bit
- Red Hat Enterprise Linux (RHEL) 6.6, 64-bit
- Red Hat Enterprise Linux (RHEL) 7.1, 64-bit

Release Contents

The files related to the Model Import Connector in the RepSM release are:

File Name	Description
RepSMModelImportConn_RelNotes_7.1.7.7607.0.pdf	Release notes (this document).
RepSMModelImportConn_ConfigGuide_7.1.7.7607.0.pdf	Configuration guide.
ArcSight-7.1.7.7607.0-RepSMModelConnector- Linux64.bin	Installer for Linux 64-bit systems.
ArcSight-7.1.7.7607.0-RepSMModelConnector- Win64.exe	Installer for Windows 64-bit systems.

Installing the Model Import Connector for RepSM

The Model Import Connector for RepSM is supported for installation on Windows and Linux platforms. For detailed instructions about installing the connector, see the HPE Configuration Guide for Model Import Connector for RepSM. You can download the installation executable and guide using the link provided in the e-mail sent to you by HPE.

Note: When installing the model import connector as a service (and as a non-root user), run this command:

```
$ARCSIGHT_HOME/current/bin/arcsight agentsvc -i -u user -sn repsm
```

Send Documentation Feedback

If you have comments about this document, you can [contact the documentation team](#) by email. If an email client is configured on this system, click the link above and an email window opens with the following information in the subject line:

Feedback on Release Notes (Model Import Connector for RepSM Plus 7.1.7.7607.0)

Just add your feedback to the email and click send.

If no email client is available, copy the information above to a new message in a web mail client, and send your feedback to arc-doc@hpe.com.

We appreciate your feedback!
