# ArcSight Forwarding Connector Release Notes

---

These release notes provide information for the current release of the ArcSight Forwarding Connector.

## ArcSight ESM Forwarding Connector

The ArcSight ESM Forwarding Connector can receive events from a source ESM Manager and then send them to a secondary destination ESM Manager, a non-ESM location (such as HP Operations Manager), or to an ArcSight Logger.

## What's New in the ArcSight Forwarding Connector

Added support of Red Hat Enterprise 6.5 and SUSE Linux Enterprise 11 SP3 platforms (both 64-bit).

## To Apply This Release

ArcSight recommends using the Forwarding Connector executable included with the corresponding ESM or HP integration release. Download and install the appropriate executable for your platform from the HP SSO site at <http://support.openview.hp.com>. Note that these version numbers are specific to Forwarding Connector releases, not release numbers of other ArcSight products.

Be sure to check the ESM release notes for supported Forwarding Connector upgrade paths.

---

The installation executable is:

- ArcSight-7.0.1.6992.0-SuperConnector64-Linux.bin

## Known Issues

Number	Description
CON-12107	<p>The certificate auto-import feature does not work for FIPS Suite B.</p> <p><b>Workaround:</b></p> <p>The certificate must be manually imported for FIPS Suite B installations.</p>
CON-13296	<p>Unable to configure the Forwarding Connector as a service if the previously-installed version of the Forwarding Connector was installed as a service.</p> <p><b>Workaround:</b></p> <p>Be sure to remove the service of a previously-installed Forwarding Connector before you uninstall the old version of the connector:</p> <ol style="list-style-type: none"><li>1 Stop the Forwarding Connector.</li><li>2 Remove the service for the Forwarding Connector. From <code>%ARCSIGHT_HOME/current/bin</code>, execute: <pre>./arcsight agentsvc -r</pre></li><li>3 Uninstall the Forwarding Connector.</li><li>4 Install the new version of the Forwarding Connector.</li></ol>
