

Connected Key Management Server

Software Version 25.2

Release Notes

opentext™

Document Release Date: April 2025
Software Release Date: April 2025

Legal notices

Copyright 2016, 2018-2025 Open Text

The only warranties for products and services of Open Text and its affiliates and licensors ("Open Text") are as may be set forth in the express warranty statements accompanying such products and services. Nothing herein should be construed as constituting an additional warranty. Open Text shall not be liable for technical or editorial errors or omissions contained herein. The information contained herein is subject to change without notice.

Acknowledgements

This product includes software written by Eric Young (eay@cryptsoft.com).

Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for updated documentation, visit <https://www.microfocus.com/support-and-services/documentation/>.

Support

Visit the [MySupport portal](#) to access contact information and details about the products, services, and support that OpenText offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- View information about all services that Support offers
- Submit and track service requests
- Contact customer support
- Search for knowledge documents of interest
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts

Many areas of the portal require you to sign in. If you need an account, you can create one when prompted to sign in.

Connected Key Management Server Release Notes

Software version: 25.2

Publication date: April 2025

This document is an overview of the changes made to OpenText Connected Key Management Server (Connected-KMS). It contains important information that is not included in books or Help. You can find information about the following in this document:

- [Enhancements in this release, on the next page](#)
- [Fixed defects in this release, on the next page](#)
- [Open defects, on the next page](#)
- [Installation, on page 6](#)

Support matrix

For information about the installation requirements and compatibility with other products, see the *OpenText Connected-KMS Support Matrix*. The support matrix may be updated between releases, and so is available only from the [Connected documentation site](#).

The support matrix includes the following information:

- **Requirements**
 - Hardware
 - Software
 - Third-party components
- **Compatibility**
 - Languages
 - Virtualization products
 - OpenText software coexistence
 - Other software coexistence

Enhancements in this release

This release includes security enhancements.

Fixed defects in this release

This release does not include any fixed defects.

Open defects

This release contains the following open defects:

-
- An additional change to the `/usr/share/tomcat/conf/server.xml` is necessary when using a Web Application Firewall (WAF) with SSL offload. The `clientAuth` attribute must be set to `false` while configuring the `server.xml`. CMX-KMS continues to validate the X.509 certificate passed by CMX agents, etc.

To set the `clientAuth` attribute to `false`,

1. Open the file `/usr/share/tomcat/conf/server.xml` in a text editor.
2. Locate the **`clientAuth`** attribute and set the value to **`false`**.

For example,

```
<Connector port="8443"
...
scheme="https"
secure="true"
clientAuth="false"
sslEnabledProtocols = "TLSv1.2"
server="Apache Tomcat" />
```

3. Restart Tomcat if it was already running after making the above modifications.

-
- OpenText Connected is re-branded as Connected with a new Connected logo (). The change is reflected in the installation paths and executable names.

Install the certificate for Agents

If you are using Connected and installing the certificate for agents, then there is no change in the **system-specific location** and **user-specific location**. But, if you are using Connected, the Connected `MX` folder is renamed as Connected. You can place the certificate into one of the following new locations:

- On Windows-based computers.
 - **system-specific location** - %ALLUSERSPROFILE%\Connected
 - **user-specific location** - %LOCALAPPDATA%\Connected
 - On macOS-based computers
 - **system-specific location** - /Library/Application Support/Connected
 - **user-specific location** - \$HOME/Library/Application Support/Connected
-

Installation

To install Connected-KMS 25.2 or upgrade to it, see the *OpenText Connected-KMS Installation and Upgrade Guide*, available from the [Connected documentation site](#).

Update cacert.pem

If the `cmxDevice.p12` is signed by the CA other than list of CAs present in `cacert.pem`, append the RootCA that signed the certificate to `cacert.pem`. This file is present in the following locations:

- %ALLUSERSPROFILE%\Connected MX for pre connected10 agents
- %ALLUSERSPROFILE%\Connected for connected10 and above agents

Send documentation feedback

If you have comments about this document, you can [contact the documentation team](#) by email. If an email client is configured on this system, click the link above and an email window opens with the following information in the subject line:

Feedback on OpenText Connected Key Management Server 25.2 Release Notes

Add your feedback to the email and click **Send**.

If no email client is available, copy the information above to a new message in a web mail client, and send your feedback to swpdl.ConnectedMx.DocFeedback@microfocus.com.

We appreciate your feedback!
