Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

You can check for more recent versions of a document through the [MySupport portal](#). Many areas of the portal, including the one for documentation, require you to sign in with a Software Passport. If you need a Passport, you can create one when prompted to sign in.

Additionally, if you subscribe to the appropriate product support service, you will receive new or updated editions of documentation. Contact your Micro Focus sales representative for details.

Support

Visit the [MySupport portal](#) to access contact information and details about the products, services, and support that Micro Focus offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- Search for knowledge documents of interest
- Access product documentation
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts
- Submit and track service requests
- Contact customer support
- View information about all services that Support offers

Many areas of the portal require you to sign in with a Software Passport. If you need a Passport, you can create one when prompted to sign in. To learn about the different access levels the portal uses, see the [Access Levels descriptions](#).

New in this Release 4

Resolved Issues 5

Supported Operating System Platforms 6

Documentation 7

New in this Release

This section lists the enhancements to HTTP Connector version 12.2.0.

- The connector supports SNI (Server Name Indication) when making TLS connections, so that it can retrieve data from web servers that require clients to support it.
- The `collect`, `insert`, `stub`, and `update` fetch actions accept metadata as structured XML, as an alternative to a flat list of name and value pairs. For information about whether a connector supports these actions, refer to the Administration Guide.
- Elliptic Curve certificates and keys are supported, to enable the use of ECDSA and ECDH ciphers in TLS communications with other IDOL components.

Resolved Issues

There were no resolved issues in HTTP Connector version 12.2.0.

Supported Operating System Platforms

NOTE:

HTTP Connector can be installed only with the IDOL Server installer, and only on Solaris platforms. On other platforms, Micro Focus recommends that you use the IDOL Web Connector instead.

The following operating system platforms are supported by HTTP Connector 12.2.0.

- Solaris x86 64
- Solaris SPARC 64

The documented platforms are the recommended and most fully tested platforms for HTTP Connector. The following sections provide more information about the most fully tested versions of these platforms.

Solaris

- Solaris 10
- Solaris 11

Documentation

The following documentation was updated for this release.

- *HTTP Connector Administration Guide*
- *HTTP Connector Reference*
